Clues are of six types: **1 Normal cryptic** (10 clues); **2 Printer's Devilry** (6 clues); **3 Wrong Number** (4 clues, all to answers of the same length); **4 Letters Latent** (6 clues); **5 Misprints** (in definitions of 6 clues); **6 Playfair** (4 answers to normal clues). Solvers should enter the word formed by the latent letters in the top row of the smaller grid, the word formed by the correct letters in misprinted definitions in the second row, and the Playfair code phrase (a title formed from 2 six-letter words) in the bottom two rows. Letters in shaded squares, starting with that in square 1, can then be arranged to form the word to be clued.
