Plus One by Phi

12 clues lead to answers one letter shorter than the given length (one such answer is of two words; another is a relatively uncommon proper noun). The grid entry in each case is an anagram of the clue answer plus an additional letter: e.g. LETTER + S => TRESTLE (one such entry is of two words). 12 other clues each contain a redundant word or phrase defining the 12 grid entries in no particular order. The 12 additional letters in clue order give a 2-word phrase defining a very specific further example of the gimmick, an 8-letter word which will also appear diagonally in the grid when the barred-off squares are correctly filled.

ACROSS

- 1 More than one undertaker complains, burying most of critic haphazardly (11)
- 11 Regret returning to America - cloudy, somewhat windy (5)
- 12 Frenchman abandoning his novel, looking red (4)
