### Sightings by Phi

There have been six misattributed sightings near 51 across. The six different things actually sighted are to be found in six different clue answers. Before the answers are entered into the grid, however, each of these things is replaced by a single-letter component of something else. Correct arrangement of these six letters should enable solvers to arrive at the alternative, four-word form of the something else, which should be highlighted in the completed grid.

## ACROSS

- 1 Psychological technique that could make Thatcher cross?
- 11 To help crook is a hazard
- 12 Country girl shuns reading
